## PROFILE

**TRUSTROL**<sup>TM</sup>  
LUBRICANTS & GREASES

### COMPANY PROFILE

Assured Petro Specialities Pvt. Ltd is an emerging multi-national company driven by passion to redefine the rules of the Lubricant Industry by bringing our prestigious brand **“TRUSTROL”**.

**“TRUSTROL”** is committed in offering the genuine lubricant made from virgin stocks only. Our products are engineered according to the toughest performance parameters across globe creating a unique benchmark for Lubricant products, making them one of the best lubricant products for use in automobiles, marine & offshore vessels and simple to sophisticated industrial machinery experiencing tough and demanding operating conditions.

**“TRUSTROL”** meet the most sought out quality standards for raw materials and manufacturing. Our finished product makes its journey through the toughest performance tests giving our end user a truly world class quality experience.

Each step as a corporate citizen is taken considering our responsibility towards the growth of our Country and its rich heritage and nature. We always value people and their association, thus believe the satisfaction of every one associated with the brand is the baseline of our success.

SPECIALITIES PVT. LTD

## PROFILE

**TRUSTROL**<sup>TM</sup>  
LUBRICANTS & GREASES

### VISION

To provide truly World-Class Lubricants engineered by modern technology with focus on energizing lives of everyone connected with us

### MISSION

To offer best-in-class product in the lubricant industry aiming to fulfil customer expectations

### VALUES

**“TRUSTROL”** Lubricants is committed to offer the best to everyone connected with us and to make it happen, we need to adhere to our fundamental values:

### Research & Development

Our passion is to create products that protect the engine and offer proactive maintenance by meeting and exceeding industrial standards. For achieving these goals, we are backed up by an outstanding research and development team. All our products are tested for vital physical and chemical characteristics before issue of QC certificate to every batch. These tests include Viscosity, TAN, TBN, Pour Point, Insoluble, Weld Load, pH, Copper Strip Corrosion etc as per the most rigorous requirements of lubricants in that particular class. These tests ensure that only the best-in-class products reach the end customer.
